Cybercriminals are exploiting the increased adoption of digital technologies to identify and target new victims. Whether the infrastructure and data are on-premise or in the cloud, organizations must take proactive steps to fortify their security defenses whilst upholding business continuity. In this session, Ingram Micro Cybersecurity will introduce how to bring security to the next level by tackling the challenges of privacy, secure online transactions, complying with rules and regulations, user awareness and cloud security. More than ever, companies need to have a wholistic strategy for cybersecurity that covers people, processes, and technologies. Therefore, promoting consultancy, trainings, managed security services and technology security bundles is essential to increase the value and realize the promise of cybersecurity. You will also learn about the features and capabilities of Ingram Micro Cybersecurity's in-house developed cybersecurity tools that equip end customers to prioritize and mitigate their most pressing cybersecurity challenges. The portfolio of software also serves as a lead generation tool for Ingram Micro's business partners, such as SpyGlass, CyberGramSM, cybersecurity awareness games, videos and assessments. <i>Marc Kassis, Director, Cybersecurity Division–Middle East, Turkey, and Africa</i>
